

Rückseite

The diagram shows a biconvex lens with a central connecting bridge. The left half is labeled 'Rückseite' (back side) and the right half is labeled 'Vorderseite' (front side). Both halves have a dashed blue line representing the optical surface and a solid magenta line representing the outer edge. A vertical blue line with horizontal end-caps in the center of each half is labeled 'optische Mitte' (optical center). The central bridge is shaded light blue and has a vertical dotted line through its center. The entire lens is set against a light gray background.
